

Water-based paints (car interior)

Hydro laser soft paint LS201-

Water-based soft paint with pleasant haptic, very good laser-etching properties and high scratch resistance.

Excellent hiding power at low film thickness.

Meets the Audi, Ford, Opel, Saab, Volvo and VW specifications.

Successfully approved on various customers spraying equipment.

Hydro laser decor paint LD202-

Water-based decorative paint with very good laser-etching properties and high scratch resistance.

Excellent hiding power at low film thickness.

Meets the Audi, DaimlerChrysler, Ford, Opel, Saab, Volvo and VW specifications.

Successfully approved on various customers spraying equipment.

Hydro soft paint S203-

Water-based soft paint with pleasant haptic and high scratch resistance.

Meets the Audi, Ford, Opel and VW specifications.

Successfully approved on various customers spraying equipment.

Hydro decor paint D204-

Water-based decorative paint with high scratch resistance.

Meets the Audi, Ford, Opel, and VW specifications.

Successfully approved on various customers spraying equipment.

Hydro nano laser soft paint SN401-

Laser-etchable water-based soft paint with pleasant haptic and high scratch resistance.

Very good laser etching properties and excellent hiding power at low film thickness.

Tests according to automotive specifications are currently ongoing.

Improvements of the cream resistance by using nano particles which enable a high packing density (substrate independent).

Product Information 1035

Hydro nano laser decor paint DN402-

Laser-etchable water-based decorative paint with high scratch resistance.
Very good laser etching properties and excellent hiding power at low film thickness.
Improvements of the cream resistance by using nano particles which enable
a high packing density (substrate independent).

Hydro nano soft paint SN403-

Water-based soft paint with pleasant haptic and high scratch resistance.
Tests according to automotive specifications are currently ongoing.
Improvements of the cream resistance got accomplished by using nano particles
which enable a high packing density (substrate independent).

Hydro nano decor paint DN404-

Water-based decorative paint with high scratch resistance.
Improvements of the cream resistance got accomplished by using nano particles
which enable a high packing density (substrate independent).
